

Karnati Navya

navyareddyk.2005@gmail.com|+919347122654 |[LinkedIn](#) |[GitHub](#) |[Portfolio](#) | Hyderabad, Telangana

Profile

Computer Science undergraduate with a strong foundation in programming, software development, and artificial intelligence. Hands-on experience in building full-stack and AI-powered applications using Java, Python, and FastAPI. Passionate about solving real-world problems, continuously learning emerging technologies, and contributing to innovative software solutions in a collaborative environment.

Education

Telangana State Board Of Intermediate Education Narayana Junior College	2021 – 2023
<i>Intermediate (MPC), Percentage: 98.6%</i>	<i>Hyderabad, India</i>
G. Narayanamma Institute Of Technology And Science	2023 – 2027
<i>B. Tech in CSE, CGPA : 8.50</i>	<i>Hyderabad, India</i>

Technical Skills

- **Languages:** C, Java, Python, SQL.
- **Relevant Coursework:** Operating Systems, Data Structures and Algorithms, Agile Methodology, Computer Networks, DBMS, OOPS through JAVA, Cloud Computing, Software Engineering.
- **Databases:** MySQL, MongoDB. | **Frameworks & Tools:** FastAPI, Streamlit, Gradio, Git, VS Code, Jupyter Notebook.
- **Concepts:** Artificial Intelligence, Machine Learning, NLP, LLMs, RAG. | **Web:** React.js, HTML, CSS.
- **Soft Skills:** Problem Solving, Analytic Thinking, Team Collaboration, Adaptability, Leadership, Self Motivated.

Certifications

- Completed Claude 101 by Anthropic. - May,2026
- Completed Natural Language Processing Certification by Infosys. – March,2026
- Completed Cloud Computing Fundamentals by IBM. – April,2026
- Completed Career Essentials in Generative AI by Microsoft and LinkedIn. – July,2025
- Completed Google AI Essentials Coursera Certification. – Nov,2024

Projects

Boosting Health Care Using Multi-modal Large Language Models:

- Developed a multimodal AI system to analyze medical images and text for report summarization and scan interpretation.
- Implemented Retrieval-Augmented Generation (RAG) using LLaMA and Radiology-Infer-Mini LLM to generate AI-assisted medical insights.
- Built an interactive interface using Gradio to provide report summarization, scan interpretation, and medication recommendations.
- Achieved 83.3% clinical keyword retention (20/24 keywords) in generated summaries, outperforming a baseline ChatGPT summary that retained 62.5% (15/24 keywords).

Trip Navigator: Smart and Sustainable Travel Planning for Innovation and Economic Growth

- Developed a multi-agent AI platform to generate personalized travel itineraries based on user preferences and budget.
- Integrated intelligent modules to recommend destinations, hotels, transportation, and budget planning using real-time travel data.
- Built the application using FastAPI and Streamlit to deliver an efficient and user-friendly travel planning experience.
- Evaluated system performance through agent execution time analysis, validating the efficiency and scalability of the multi-agent travel planning architecture.

Extra Curriculars

- Attended Women In Leadership Conclave (WILC '25).
- Attended a Workshop on Chatbot Development: Building Smart Conversational Agents GNITS 25.
- Developed a Research Pilot AI Agent during the GenAI Forge Hackathon, showcasing innovation in autonomous AI-driven solution development.
